

Chem 232, Organic Chemistry
Summer 2016 – Session 2

Instructor: Dr. B. Mikael Bergdahl (bbergdahl@mail.sdsu.edu)

Office: **GMCS 213G**

Phone: (619) 594-5865 (office)

Lecture meetings: Daily: 12:00-1:15, **PG 242**

Office Hours: TTh: 9:00 - 11:00 and by appointment

Texts: (a) Solomons & Fryhle & Snyder, *Organic Chemistry*, 11th Ed., Wiley Publ. 2014

ISBN: 978-1-118-13357-6.

(b) Solomons, Fryhle, Snyder, *Student Guide and Solutions Manual Organic Chemistry* 11th Ed.

ISBN: 978-1-118-14790-0.

Lab: (a) R. Somanathan *et al.*, *Chem 232 Lab Supplemental Material*.

(b) Pavia *et al.* *Laboratory text*. Available in laboratory.

Tool: A set of molecular models, such as Prentice-Hall Molecular models, is optional but strongly recommended.

E-HW: None

Expected Student Learning Outcomes (Chemistry 232 objectives):

a) To be able to understanding physical properties of organic substances and fundamental chemical reactions in organic chemistry.

b) To be able to determine bonds and hybridizations, Lewis structures, dynamics and stereochemistry of simple organic molecules.

c) To be able to depict chemical mechanisms for rudimentary organic reactions using the curved arrow formalism.

d) To be able to determine and differentiate various types of simple organic reactions: S_N1, S_N2, E1 and E2 pathways.

e) To be able to understand the relationship between different functional groups and organic chemical reactions.

f) To be able to see a connection and similarity between organic chemistry and the application on common “daily life” biochemical processes.

g) To be able to apply and use the outcomes above and apply those in upper division organic chemistry (Chem 432), biochemistry, and more advanced organic chemistry and synthesis.

Prerequisite: A grade of “C” or better from Chem 201 or corresponding chemistry course.

Adding Procedures: Add codes will be provided first day of class (or lab) if space allows and pre-req is filled.

Dropping Procedure: Students will be added from the waitlist only if space is available the first week of class.

Course Structure and Conduct: The lecture course consists of five (daily) 1-hour 15 min face-to-face lectures per week. Lectures will be focused on the theoretical basis and understanding of important concepts of organic chemistry. You will not be penalized for not attending lectures directly, but please be aware that there is a *correlation between attendance and lower course grades in organic chemistry*.

Student disabilities: If you are a student with a disability and believe you will need accommodations for this class, it is your responsibility to contact Student Disability Services at (619) 594-6473. To avoid any delay in the receipt of your accommodations, you should contact Student Disability Services as soon as possible. Please note that accommodations are not retroactive, and that I cannot

provide accommodations based upon disability until I have received an accommodation letter from Student Disability Services. Your cooperation is appreciated.

Course Assessment and Grading: Two midterm exams will be given on Mondays during regular lecture schedule (**Jul. 18, and Aug. 1**) from Noon – 2pm. *Make sure you can take the exams on these dates before enrolling this class!!* The final exam will be given on **Monday, Aug 15th** from Noon – 2 pm. No make up exams will be given. Excused absences, substantiated by an appropriate written and signed confirmation, will result in no penalty. Unexcused absences will result in a “zero” and will account for an “F” grade for such exam. Your TA along with the instructor will grade your midterms and final exam. ***Your course grade will be assigned at the end of the summer session and will be based on a curve using a +/- assignment.*** (Letter grades will be assigned for each individual exam – the +/- assignment will not be used for specific exams. There are no pre-determined guidelines for the grade distribution. Most students earn a C, but in fact, it is not too difficult to earn a higher grade in organic chemistry. The cut-off for specific grades varies, but in general an “A” accounts for >85%, a “B” >70% and a “C” around 50%. Exam Scores will be posted on Black Board.

Electronic Homework: None

Grading: Your course grade will be based on 400 points maximum.

Summary:	Midterm 1	100	points
	Midterm 2	100	
	<u>Final Exam</u>	<u>200</u>	
	Total	400	points

Academic Honesty: The University adheres to a strict policy regarding cheating and plagiarism. These activities will not be tolerated in this class. Become familiar with the policy (<http://www.sa.sdsu.edu/srr/conduct1.html>).

Any cheating or plagiarism will result in failing this class and a disciplinary review by Student Affairs.

Examples of Plagiarism include but are not limited to:

- Using sources verbatim or paraphrasing without giving proper attribution (this can include phrases, sentences, paragraphs and/or pages of work)
- Copying and pasting work from an online or offline source directly and calling it your own
- Using information you find from an online or offline source without giving the author credit
- Replacing words or phrases from another source and inserting your own words or phrases
- Submitting a piece of work you did for one class to another class

If you have questions on what is plagiarism, please consult the policy (<http://www.sa.sdsu.edu/srr/conduct1.html>)

and this helpful guide from the Library:

(http://infodome.sdsu.edu/infolit/exploratorium/Standard_5/plagiarism.pdf)

Chem 232L: The laboratory component of the grade will be based on the completion of the experiments, the reports, unknowns, products, quizzes and an evaluation of experimental technique. The laboratory grade (chem 232L) is separate from the chem 232 grade.

You must attend your first scheduled lab or your spot may be forfeit!

Chem 232 Lab Crashers:

- Preference will be given to SDSU enrolled students, “open university” students will be accepted, provided no SDSU enrolled student participates in the lottery.
- Preference will be given to students taking Lecture and Lab concurrently.
- Students enrolled must show up for the first day of the lab.

- To keep their space in the lab, failure to show-up after 1hr the space will be given to crasher.
- Add codes for the lecture (students who are repeating the lecture to get a better grade, provided they passed the lab) may be obtained from the instructor only if space allows.
- Crashers obtaining a lab space will be provided an add code to lecture.

To the student and how to succeed in Organic Chemistry (and science in general):

1. *Develop good study habits:*
 - a. Attend all lectures and labs.
 - b. Take good lecture notes.
 - c. Use your lecture notes as a guide to your reading in the textbook. Write your questions down if there is something you don't understand. Ask your instructor if you don't understand a concept.
 - d. Make flash cards of definitions, concepts, reactions, structures, and nomenclature that are in the textbook that are emphasized by your instructor in lecture. Writing something is equivalent to reading it ten times.
 - e. Do all the homework problems with the aid of the study guide or answer book. The suggested problems (homework) have about the same difficulty as the problems you will be given on the exams.
 - f. One of the alternative ways for understanding of organic chemistry is to find a study partner or to form a study group and work on problems independently, and then review the answers in the group.
 - g. Keep up to date and **don't fall behind**.
 - h. Seek course advice from science professors and students.
 - i. If necessary, see your instructor or department for a tutor.
 - j. Try to see the "big picture"; try to see how the topic of the week fits in with the whole course. If you have a difficulty achieving this, ask your instructor.
 - k. Practice applying what you have learned in class to the world around you.
 - l. Try to foster your own scientific curiosity – wonder why things are and how they happen.
 - m. Put emphasis on understanding concepts rather than memorizing material.
 - n. If you read the text more than 10 minutes without practicing a problem, something is wrong.....this is not how you should study organic chemistry.
2. *Have a positive attitude.*
3. *Realize that science requires more self discipline than many other majors, but actually offers more rewards.*
4. *Be organized.*
5. *Persevere and be determined to succeed.*

Good Luck in Chem 232!!

Ithaca (a philosophical view of the journey of Organic Chemistry)

by [Constantine P. Cavafy](#)

(1863 - 1933)

When you set out on your journey to Ithaca,
pray that the road is long,
full of adventure, full of knowledge.
The Lestrygonians and the Cyclops,
the angry Poseidon -- do not fear them:
You will never find such as these on your path,
if your thoughts remain lofty, if a fine
emotion touches your spirit and your body.
The Lestrygonians and the Cyclops,
the fierce Poseidon you will never encounter,
if you do not carry them within your soul,
if your soul does not set them up before you.

Pray that the road is long.
That the summer mornings are many, when,
with such pleasure, with such joy
you will enter ports seen for the first time;
stop at Phoenician markets,
and purchase fine merchandise,
mother-of-pearl and coral, amber, and ebony,
and sensual perfumes of all kinds,
as many sensual perfumes as you can;
visit many Egyptian cities,
to learn and learn from scholars.

Always keep Ithaca on your mind.
To arrive there is your ultimate goal.
But do not hurry the voyage at all.
It is better to let it last for many years;
and to anchor at the island when you are old,
rich with all you have gained on the way,
not expecting that Ithaca will offer you riches.

Ithaca has given you the beautiful voyage.
Without her you would have never set out on the road.
She has nothing more to give you.

And if you find her poor, Ithaca has not deceived you.
Wise as you have become, with so much experience,
you must already have understood what these Ithacas mean.

Highly recommended problems (Solomons & Fryhle, *Organic Chemistry*, 11th Ed.).

Chapter 1, The Basics, Bonding and Molecular Structure: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 47, 50

Chapter 2, Families of Carbon Compounds: 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 46

Chapter 3, Acids and Bases: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 13, 14, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 29, 30, 31, 32, 33, 34, 35, 37

Chapter 4, Nomenclature and Conformations of Alkanes and Cycloalkanes: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 15, 16, 17, 18, 19, 23, 24, 26, 27, 28, 29, 33, 36, 37, 38, 39, 41, 43, 44, 45, 46

Chapter 5, Stereochemistry: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 33, 35, 36, 37, 38, 39, 40, 42, 44, 45, 46, 48

Chapter 6, Ionic Reactions: 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 38, 39, 40, 41, 42, 43, 45, 46, 47

Chapter 7, Alkenes and Alkynes I: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44

Chapter 8, Alkenes and Alkynes II: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 15, 16, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 45, 46, 53, 54, 58, 59, 61

Chapter 10, Radical Reactions: 2, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 23, 24, 25, 26, 29, 30, 31, 32, 33

Chapter 11, Alcohols and Ethers: 2, 3, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27, 28, 29, 30, 31, 32, 33, 34, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 52
