

Bulletin of the Graduate Division Description

Specific Requirements for the Master of Sciences Degree

(Major Code: 10951)

In addition to meeting the requirements for classified graduate standing, the student must satisfy the basic requirements for the master's degree as described in Part Two of this bulletin. The student must also complete a graduate program of 30 units which includes a major consisting of at least 24 units in Chemistry from courses listed below as acceptable on master's degree programs. At least 15 of these units must be in 600 and 700 numbered courses. Chemistry 791, 792 and 799A are required. Also, at least one 700 level Chemistry course of at least 2 units and numbered below 790 is required. A student must pass a final oral examination on the thesis.
