
NUCLEIC ACID FUNCTION AND PROTEIN SYNTHESIS

CHEM 563

FALL 2020

SCHEDULE NUMBER 20881

COURSE INFORMATION

Class Days: MWF Aug 24 – Nov 4, 2020

Class Times: 1:00 – 1:50 pm

Instructor: Manal Swairjo, PhD.

Zoom office hours: Thursdays 12-1:15 pm & by
appointment mswairjo@sdsu.edu

Class Zoom link:

<https://SDSU.zoom.us/j/97916159351>

Office Hours Zoom link:

<https://SDSU.zoom.us/j/91417090322>

COURSE OVERVIEW

Course description:

This is a course in advanced, selected topics in modern chemistry. The course may be repeated with new content. The content of this course focuses on the biochemistry of nucleic acids and protein synthesis, from structure to function to mechanisms. Topics include the structures and properties of nucleotides and nucleic acids, prokaryotic and eukaryotic DNA replication, nucleic acid purification and analysis, bacterial and eukaryotic transcription, posttranscriptional RNA processing, translation and the genetic code, prokaryotic and eukaryotic protein synthesis, protein synthesis targets of antibiotics, regulation of gene expression, DNA structure in cell cycle, and reverse transcription.

Student Learning Outcomes:

Students who complete this course will be able to

- 1) Illustrate and compare in molecular detail how prokaryotic versus eukaryotic cells replicate DNA.
- 2) Illustrate and compare in molecular detail how prokaryotic versus eukaryotic cells synthesize RNA.
- 3) Illustrate in molecular detail how living cells synthesize proteins.
- 4) Describe how eukaryotes process their newly synthesized RNA to the final functional RNA.
- 5) Compare how prokaryotes versus eukaryotes control/regulate the expression of genetic information.
- 6) List the common modes by which proteins interact with nucleic acids, and predict the structural and functional outcomes of these interactions.

Real Life Relevance:

“Science is more than a body of knowledge; it is a way of thinking. I have a foreboding of an America in my children's or grandchildren's time—when the United States is a service and information economy; when nearly all the key manufacturing industries have slipped away to other countries; when awesome technological powers are in the hands of a very few, and no one representing the public interest can even grasp the issues; when the people have lost the ability to set their own agendas or knowledgeably question those in authority; when, clutching our crystals and nervously consulting our horoscopes, our critical faculties in

decline, unable to distinguish between what feels good and what's true, we slide, almost without noticing, back into superstition and darkness."

-Carl Sagan, *The Demon-Haunted World: Science as a Candle in the Dark*, 1995.

This course is an entry way to understanding modern medicine and biotechnology, and is an essential introduction of necessary knowledge for any career in these fields, including job placements in the biotechnology industry and health professions.

Relation to Other Courses:

This course builds on concepts introduced in General Biochemistry CHEM 560 (and CHEM 365), and builds toward more advanced concepts covered in CHEM 596 (Adv. Biochemistry of Nucleic Acids).

ENROLLMENT INFORMATION

Prerequisites:

CHEM 560 (General Biochemistry), CHEM 365 (Biochemistry, Cell & Molecular Biology), or the equivalent (one semester of upper-level biochemistry). Credit for 563 is applicable to a master's degree with approval of the graduate adviser.

Adding/Dropping Procedures:

You can drop the class within the first 10 days of the semester (university policy).

COURSE MATERIALS

Required Materials:

Textbook: Voet, Voet, and Pratt: "**Fundamentals of Biochemistry**", Wiley, 5th edition (2016). Most of you have used this textbook for CHEM 560.

Recommended Material: All other course material (Lecture Powerpoints, Zoom lecture recordings, quizzes and exams) will be posted on Canvas.

COURSE STRUCTURE AND CONDUCT

This online course is structured in three modules, each includes several lectures, quizzes and a non-cumulative exam. Synchronous lectures will be given via Zoom on MWF 1:00-1:50 pm, with the exception of some Fridays (see Course Schedule below). The Zoom lectures will be recorded, and links to the lecture recordings will be posted on Canvas. All other course material (lecture powerpoints, and graded course activities/quizzes and exams) will be posted on Canvas one module at a time.

Technology Utilized in the Course:

Zoom, SDSU Canvas account, internet.

Also recommended: install on your computer the Pymol software (free student version, Schrodinger)

<https://pymol.org/edu/?q=educational/>

COURSE ASSESSMENT AND GRADING

- There will be a few short activities/quizzes that will post with each course module on Canvas, totaling 7 such quizzes/activities for the whole course. For each module, you can complete the quizzes/activities any time during that module's instruction period (several weeks).
- There will be three exams in this course, one after each module. Each exam will be available on Canvas from 1 pm on the date specified in the Course Schedule to 1 pm the next day. All exams are open book and open notes. None of the exams is cumulative.

Quizzes/activities 1-7: 10 points each

Exams 1-3: 50 points each.

Total: 220 points.

Grading scale:

Percent Score	Grade
≥ 93.33	A
90 to < 93.33	A-
86.66 to < 90	B+
83.33 to < 86.66	B
80 to < 83.33	B-
76.66 to < 80	C+
73.33 to < 76.66	C
70 to < 73.33	C-
66.66 to < 70	D+
60 to < 66.66	D
< 60	F

Excused Absence Make-up Policies:

You are required to take exams on the scheduled dates. Make up exams are offered only with a documented medical emergency to be assessed at my discretion, AND a written excuse from the Office of Student Life.

ACADEMIC HONESTY

The University adheres to a strict [policy regarding cheating and plagiarism](#). These activities will not be tolerated in this class. Become familiar with the policy and what constitutes plagiarism (<http://studentaffairs.sdsu.edu/srr/cheating-plagiarism.html>). Any cheating or plagiarism will result in failing this class and a disciplinary review by the University. These actions may lead to probation, suspension, or expulsion.

Examples of Plagiarism include but are not limited to:

- Using sources verbatim or paraphrasing without giving proper attribution (this can include phrases, sentences, paragraphs and/or pages of work)
- Copying and pasting work from an online or offline source directly and calling it your own
- Using information you find from an online or offline source without giving the author credit
- Replacing words or phrases from another source and inserting your own words or phrases
- Submitting a piece of work you did for one class to another class

For more information on plagiarism, consult the SDSU policy (<http://www.sa.sdsu.edu/srr/conduct1.html>).

TURNITIN

Students agree that by taking this course all required papers may be subject to submission for textual similarity review to [Turnitin.com](https://www.turnitin.com) for the detection of plagiarism. All submitted papers will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. You may submit your papers in such a way that no identifying information about you is included. Another option is that you may request, in writing, that your papers not be submitted to www.turnitin.com. However, if you choose this option you will be required to provide documentation to substantiate that the papers are your original work and do not include any plagiarized material.

TECHNICAL SUPPORT FOR CANVAS

Student Canvas support: <https://library.sdsu.edu/computers-technology>

COURSE SCHEDULE

	Lecture	DATE	TOPIC	Reading (from 5 th edition)
Module 1	1	Monday, August 24, 2020	Discovery of the “gene” classic experiments. Nucleotides, basic nucleic acid structure.	Ch 3 pp 42-53. Ch 24 pp 832-840.
	2	Wednesday, August 26, 2020	Review of Nucleic acids structures and functions	Ch 3 pp 42-53. Ch 24 pp 832-840.
	no class	Friday, August 28, 2020		
	3	Monday, August 31, 2020	Forces stabilizing nucleic acid structures. Geometry of DNA. Age and size of DNA. The origins of life.	Ch 24 pp 848-856.
	4	Wednesday, September 2, 2020	Prokaryotic DNA replication, part 1	Ch 25 pp 880-897.
	5	Friday, September 4, 2020	Prokaryotic DNA replication, part 2	Ch 25 pp 880-897.
	no class. Labor Day holiday	Monday, September 7, 2020		
	6	Wednesday, September 9, 2020	DNA Supercoiling and Topoisomerases	Ch 24, pp 840-847.
	7	Friday, September 11, 2020	Eukaryotic DNA replication.	Ch 25 pp 898-902.

	Exam 1	Monday, September 14, 2020	Exam on material covered in lectures 1-7	
Module 2	8	Wednesday, September 16, 2020	Transcription in prokaryotes: bacterial RNA polymerase, promoters.	Ch 26 pp 938-948.
	9	Friday, September 18, 2020	Transcription in prokaryotes: initiation, elongation and termination.	Ch 26 pp 938-948.
	10	Monday, September 21, 2020	Transcription in eukaryotes: eukaryotic RNA polymerases and general transcription factors.	Ch 26 pp 948-961.
	11	Wednesday, September 23, 2020	Post-transcriptional processing of mRNA in eukaryotes: mRNA capping, poly-adenylation, splicing, alternative splicing, RNA transport to the cytoplasm.	Ch 26 pp 961-973
	no class	Friday, September 25, 2020		
	12	Monday, September 28, 2020	post-transcriptional processing of rRNA and tRNA.	Ch 26 pp 973-978.
	13	Wednesday, September 30, 2020	reverse transcription and other examples of viral replication, antiviral drugs.	Ch. 25 pp 900-901
	Exam 2	Friday, October 2, 2020	Exam on material covered in lectures 8-13	
Module 3	14	Monday, October 5, 2020	Translation, part 1: aminoacylation and the wobble hypothesis.	Ch 27 pp 982-1004.
	15	Wednesday, October 7, 2020	Translation, part 2: ribosome structure.	Ch 27 pp 994-1004.
	no class	Friday, October 9, 2020		
	16	Monday, October 12, 2020	Translation, part 3: Stages of ribosomal translation: initiation.	Ch 27 pp 1004-1024.

17	Wednesday, October 14, 2020	Translation, part 4: Stages of ribosomal translation: elongation and termination. Antibiotics that target translation. Posttranslational processing.	Ch 27 pp 1004-1029.
no class	Friday, October 16, 2020		
18	Monday, October 19, 2020	Gene regulation in prokaryotes: the lac operon and its repression and activation. Helix-turn-helix DNA binding motif. Riboswitches.	Ch 28 pp 1043-1048. Ch 24 pp 861-862. Ch 24 pp 1050-1052.
19	Wednesday, October 21, 2020	Gene regulation in eukaryotes, part 1: DNA binding domains in eukaryotic transcription factors.	Ch 28 pp 1063-1069. Ch 24 pp 864-867.
no class	Friday, October 23, 2020		
20	Monday, October 26, 2020	Gene regulation in eukaryotes, part 2: Role of chromatin.	Ch 24 pp 868-873. Ch 28 pp 1052-1063. Ch 28 pp 1069-1075.
21	Wednesday, October 28, 2020	Gene regulation in eukaryotes, part 3: Posttranscriptional control of gene expression: RNA interference.	Ch 28 pp 1069-1075.
no class	Friday, October 30, 2020		
no class	Monday, November 2, 2020		
Exam 3	Wednesday, November 4, 2020	Exam on material covered in lectures 14-21	

ESTIMATED TIME COMMITMENT

TABLE 1: MODULE AND ESTIMATED HOURS

Module	Estimated hours
1. nucleic acid structure and chemical properties, central dogma, molecular evolution.	4 lecture, 8 study hours
2. DNA replication	3 lecture, 6 study hours
2. transcription	6 lecture, 12 study hours
6. translation	4 lecture, 8 study hours
7. gene regulation	4 lecture, 8 study hours

STUDENTS WITH DISABILITIES

If you are a student with a disability and believe you will need accommodations for this class, it is your responsibility to contact Student Disability Services at (619) 594-6473. You can also learn more about the services provided by visiting the [Student Disability Services](#) website.

To avoid any delay in the receipt of your accommodations, you should contact Student Disability Services as soon as possible. Please note that accommodations are not retroactive, and that accommodations based upon disability cannot be provided until you have presented your instructor with an accommodation letter from Student Disability Services. Your cooperation is appreciated.

STUDENT SERVICES

A complete list of all academic support services is available on the [Academic Success](#) section of the [SDSU Student Affairs](#) website.

For help with improving your writing ability, the staff at the SDSU [Writing Center](#) is available in person and online.

[Counseling and Psychological Services](#) offers confidential counseling services by licensed psychologists, counselors, and social workers. More info can be found at their website or by contacting (619) 594-5220. You can also Live Chat with a counselor http://go.sdsu.edu/student_affairs/cps/therapist-consultation.aspx between 4:00pm and 10:00pm, or call San Diego Access and Crisis 24-hour Hotline at (888) 724-7240.

COPYRIGHT POLICY

SDSU respects the intellectual property of others and we ask our faculty & students to do the same.

It is best to assume that any material (e.g., graphic, html coding, text, video, or sound) on the Web is copyrighted unless specific permission is given to copy it under a [Creative Commons License](#). More information about the use of copy written material in education as part of the [TEACH Act](#) and [Copyright Fair Use Guidelines](#). Whenever possible, you should attribute the original author of any work used under these provisions.
